Scalability & Future Plan Template

System limitations, scalability proposals, and development roadmap.

Current System Limitations

S.No	Limitation Identified	Project Impact	Resolution Priority
1	Small local dataset size (614 rows).	Limits model generalization on unseen property areas.	High
2	No persistent database logs.	Past prediction history is lost on server restart.	Medium
3	Local server hosting.	Cannot scale to concurrent external bank queries.	Medium

Future Roadmap Phases

Phase Name	Target Enhancement	Timeline	Business Impact
Phase 2	Database Logging integration	2 weeks	Store applicant query logs in a PostgreSQL database.
Phase 3	API credit bureau connection	4 weeks	Retrieve applicant Credit History dynamically using live APIs.
Phase 4	Explainable AI (SHAP)	6 weeks	Provide visual credit risk factor graphs to underwriting administrators.
